EDUCATION

Graphic Era Deemed to be University, Dehradun

B.Tech - Computer Science and Engineering - **CGPA - 9.46**

2022 – Present

Dehradun, Uttarakhand

Police D.A.V. Public School, Jalandhar

Class 12th, Percentage: **95.4%**

2021 – 2022

Jalandhar, Punjab

Police D.A.V. Public School, Jalandhar

Class 10th, Percentage: **95.8%**

2019 – 2020

Jalandhar, Punjab

CORE COMPUTER SCIENCE

- Data Structures
- Algorithms
- Operating Systems
- Computer Networks
- Database Management Systems
- Object-Oriented Programming

EXPERIENCE

MakeMyTrip

November 2025 – June 2026

Site Reliability Engineer Intern

Gurugram, India

- Supported production microservices deployed on AWS ECS/Fargate, assisting in service provisioning, deployments, secret management and operational reliability.
- Monitored production workloads using **Datadog, Grafana and Zabbix**, triaging infrastructure and application alerts while participating in incident response to maintain service availability.
- Investigated production incidents involving ALB 5xx errors, ECS task failures, health checks and application logs, collaborating with development teams to identify root causes.
- Worked with **Docker containers** during production troubleshooting and deployment verification in containerized environments.
- Worked with **Debezium-based CDC pipelines**, validating connector configurations and assisting in production troubleshooting for real-time data synchronization.
- Utilized Linux utilities, SSH and log analysis for production debugging, service validation and infrastructure troubleshooting.

PROJECTS

SRE Incident Toolkit 🗡️ | Python, FastAPI, Docker, Streamlit, Linux

April 2026

- Developed a lightweight SRE incident-response toolkit to automate operational health checks, log analysis, and system diagnostics for Linux-based services, improving troubleshooting efficiency.
- Implemented features including service health validation, CPU, memory and disk utilization monitoring, structured log parsing, and automated incident report generation using Python.
- Containerized the application using Docker and designed a modular architecture to support future integration with AWS ECS, Datadog, and Grafana APIs.

Sentiment Analysis -Online course Reviews 🗡️ | Python, Sci-kit Learn, NLTK

March 2024

- Processed and analyzed 50,000+ text records using efficient feature extraction techniques (TF-IDF, Word2Vec).
- Implemented and compared multiple ML algorithms (SVM, KNN, Naive Bayes) to evaluate performance trade-offs.
- Optimized model pipeline achieving 93.34% accuracy with improved computational efficiency.

TECHNICAL SKILLS

- **Languages:** Python, C, C++, JavaScript, SQL, Java
- **Devops & Cloud:** AWS(ECS, EC2, CloudWatch, Athena, ALB, Route53), GCP(basic), Docker, Linux, Networking, Kibana, Bash
- **Monitoring:** Grafana, Zabbix, Datadog, Scalyr
- **Developer Tools:** Git, GitHub, Jupyter, VS Code
- **Databases:** MySQL
- **Technologies:** Debezium, REST APIs, Node.js, Express, React

CERTIFICATIONS/ACHIEVEMENTS

- Introduction to Git and GitHub - Google
- Responsive Website Basics: Code with HTML, CSS, and JavaScript
- National Semi-Finalist - Flipkart Grid 7.0
